RACING SIMULATOR GUIDE

TIPS, TRICKS & HOW TO PLAY

DRIIFT. DRIVE. DOMINATE.

Ask for help! That's why we're here!

You can always refer to the guide first if you'd like, or just hit the doorbell button located on your VR Racing Sim and an attendant will be right with you.

EQUIPMENT OVERVIEW

SEAT

Please be careful hopping in and out of the seat. Don't put weight on the wheel. There is a handle under The Seat for adjusting forward/backward for comfort.

HEADSET

The headset will be sitting there. Please ask the staff for help with taking it on or off. And if you're not using the headset while playing, please be mindful of it. You can control the volume on the headset, located on the top right of the pimax. Be careful, though! The power button is right in front the volume buttons.

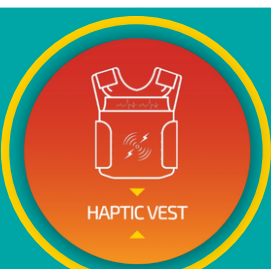

CONTROLLER OPTIONS

There are several different controllers to use based on the experience. The Mouse is navigating menus while BeamNG only. The Gamepad is for controller most of the VR experiences. And a Vive controller (Wand) for selecting your game on the game menu.

SWAPPING GAMES

When switching games in VR, click the "system" menu button at the bottom of the VR controller to go back to the game selection. If you want to switch to NON-VR, push the button to call the staff for help.

5 DIFFERENT RACING SIMS TO PLAY

	 Race Controls	 NOT IN VR	 HAPTIC VEST
	 Race Controls	 ONLY IN VR	 HAPTIC VEST
	 GAMEPAD CONTROLS	 VR OPTIONAL	 HAPTIC VEST
	 GAMEPAD CONTROLS	 VR OPTIONAL	 HAPTIC VEST
	 GAMEPAD CONTROLS	 VR OPTIONAL	 HAPTIC VEST

BeamNG

Sandbox Sim with Real Physics

BeamNG is a realistic racing simulator that offers a wide range of features and gameplay options for gamers of all expertise. The game has a realistic physics engine, a wide variety of vehicles to choose from, an open-world environment, and extensive modding support. It's a great all-around choice due to its realism, variety, and customization options.

Menu: XBOX Button 

Navigating Menus: **Mouse**

Change Perspective: Select 

Free Look: D-Pad Controls 

Reset/Rewind: **RSB**

Drift: **LSB**

Re-center Camera: 

BEAMNG INFO & CONTROLS

Controls will vary slightly from car to car as some have Automatic Transmissions and some have Manual. When you select a car or reset your car you will be in neutral and you will need to use the right paddle shifter to shift into Drive if it's automatic, or 1st gear if it's Manual. Some Manual cars can only use the paddle shifters while others can use both.

MULTIPLAYER INSTRUCTIONS

Joining each other in Multiplayer can be a great way to make your BeamNG experience even more fun! From racing each other on the drag strip to seeing who can do the coolest tricks, multiplayer has a lot to offer! To join a friend, select the multiplayer option on the Main Menu. From there select Login as Guest and select the Favorites option on the left hand side. This will show you all of the recommended servers. Simply select the same server as your friend and start racing!

STAFF PICKS, TIPS & TRICKS

Since there are so many options in BeamNg it can be tricky to know where to start. We recommend that your first map is West Coast USA. This map has almost everything you could want in it from highways to cities, drag strips, dirt tracks, forest roads and even some races against AI!

ADVANCED CONTROL OPTIONS

BeamNG is a robust simulator with a ton of options for you to explore!

Some of the most fun ones are changing the time of day through the Environment tab in your menu, and tuning your car to make it exactly how you want it through the Vehicle Config tab. Spend some time looking around in these menu's, there are lots of fun options to play with!

You can always refer to the manual first if you'd like, or just hit the doorbell button located on your VR Racing Sim and an attendant will be right with you.

DownShift

ONLY IN VR

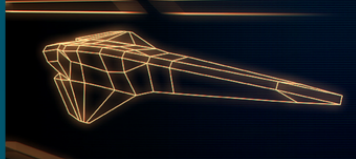

Arcade Style, Multiplayer Racing

Downshift is a great VR racing game for beginners who loved old arcade games like Cruisin' USA. It has a retro aesthetic, easy controls, and variety of tracks and cars. Plus, the multiplayer component adds a layer of fun and competition. It's a nostalgic and enjoyable VR experience for all ages.

Race Controls

ballisticNG

ballisticNG

High Speed Anti-Gravity Racer

"BallisticNG" is great for players who enjoy fast-paced, high-speed racing. Reminiscent of old games like "Wipeout" and "F-Zero", BallisticNG features challenging tracks, tight corners, and obstacles. The VR option immerses you directly in the action while multiplayer adds an extra layer of excitement and competition.

VR OPTIONAL

GAMEPAD CONTROLS

GRIP

VR OPTIONAL

High Octane, Hardcore Combat Racer

GRIP delivers one of the fastest and most unique racing experiences ever as you scale walls, ceilings and anything else you can get your ride onto! Use weapons and power-ups to take out opponents as you race on various tracks and environments. The combination of racing and combat creates a thrilling experience, and the VR aspect adds deep immersion. Grip is an innovative and exciting game that offers a unique and unforgettable gaming experience!

GAMEPAD CONTROLS

VOX MACHINAE

Giant Robot Combat Mech Simulator

Vox Machinae is a VR mech simulation game that immerses players in a mechanical world. Using VR technology, players can fully experience the power of piloting a giant robot! The game is designed for Virtual Reality providing unparalleled immersion and control. Players can battle other players online or take on challenging missions. It's the ultimate VR mech gaming experience!
